NOVEMBER 2017

NATURAL RESOURCES

NOTE TO DAWSON-AREA RESIDENTS

During October and November, Yukon Forest Management Branch and Tr'ondëk Hwëch'in Land and Resources Branch will be conducting a survey on forest use in the Dawson area.

The survey is gathering data as part of Tr'ondëk Hwëch'in and Yukon government work to implement the Dawson Forest Resources Management Plan. The two governments will include survey results in a status report in 2018.

Yukon Bureau of Statistics will complete the survey by phone with randomly selected Dawson residents. Those residents who cannot be reached will be visited in November by Tr'ondëk Hwëch'in and Yukon government representatives.

If you have questions or concerns, please contact Darren Bullen at Tr'ondëk Hwëch'in at (867) 993-7100 ext. 116 or Robin Sharples at Yukon Forest Management Branch (867) 633-7908.

ATTENTION TH TRAPPERS

Have you completed your trapper training workshop? Planning on completing the workshop this fall? Are you interested in trapping on a TH group trapline?

If so, please come into the TH Fish & Wildlife office and talk with us about your interest and find out which traplines are available for trapping.

For more information please call Natasha Ayoub at 993-7100 ext. 115 or Simon Nagano at 993-7100 ext. 127

RESEARCH TO ENSURE SUSTAINABLE TIMBER HARVEST

DATE TBD

Tr'ondëk Hwëch'in, Yukon Government, and Dawson District Renewable Resources Council are working collaboratively on a **Timber Supply Analysis** (TSA) for the Dawson forest planning area. The TSA is part of a review to determine the Annual Allowable Cut, which in turn ensures that timber continues to be harvested sustainably.

The TSA process flows from the TH Final Agreement (1998), Yukon government's *Forest Resources Act* (2011) and the Dawson Forest Resources Management Plan (2013). A Community Information Session will be hosted on a date to be determined. If you enjoy using the land and would like to know more, plan to join us.

Please contact Land & Resources Manager, Kay Linley, at 993-7100 ext. 160.

POSITIONS AVAILABLE: ADVISORY COMMITTEE

Two seats are available on the **Natural Resources Advisory Committee**. If you're interested in fish and wildlife, land use, and resource management, this could be for you. The term is two years.

For information and an application form, contact Nicole Becker at 993-7100 ext. 176.

NATURAL RESOURCES

REMINDER TO TH HARVESTERS

With harvesting season well and truly upon us, TH Fish and Wildlife Branch is requesting your harvest data. Harvest data is important for TH as a government to exercise rights provided under the Final Agreement and help us manage our resources in traditional, sustainable ways. Helpful information includes:

- Number of fish and / or wildlife harvested
- Female / male
- Size / age / condition
- Gear type used
- Hours of effort
- General location
- Any information about change on the land
- Anything of concern that you'd like Fish and Wildlife to monitor or patrol.

Feel free to stop by the Fish & Wildlife office on the ground floor of the TH Administration building. Alternatively, call Natasha Ayoub, Fish & Wildlife Manager, at 993-7100 ext. 115 or Simon Nagano, Fish & Wildlife Steward, at ext. 127.

NOVEMBER IS OSTEOPOROSIS MONTH

Osteoporosis occurs when weakened areas or even small holes form in our bones, which can lead to pain and fractures.

You can push back against the onset of osteoporosis through healthy eating. Foods that help fight osteoporosis include the following:

Wild-caught fish – Wild-caught fish contain plenty of Omega-3 fats, which help reduce inflammation that may be linked to osteoporosis.

Leafy green vegetables – Leafy green vegetables are full of calcium and vitamin K—two things our bones need to stay strong.

Alkaline foods – An acidic body environment may increase the likelihood of developing osteoporosis. Eating plenty of fruits and vegetables will promote a more alkaline environment. Some alkaline foods include ripe bananas, mushrooms, spinach, cucumber, and cabbage.
